With pleasure you can imagine Botnet "LORDIX"

What can he do?

Botnet:

1. Full information about the PC victim screen with info

SPOILER: INFO BOT

2. Each n minutes the bot makes a screen of the user's screen and sends it to the panel (the time of status can be selected in the settings)

Commands:

3. Download and start (to disk)

4. Update the client on the PC

5. Open the link (apparently and invisibly)

6. Closing the process on the user's PC

7. Execution of cmd commands

8. Uploading a file to the server

9. Https door (beta)

11. Targeting by country, profile

Module of the miner:

12. mining on gpu

13. built-in config

14. hidden by process or window name (setting in the panel)

15. display hashrate stiller

module:

16. stiller cookies and passes from browsers

17. stiller files from the desktop (in folders and subfolders extension can be configured in the panel)

18. Displaying statistics in the Clipper Module panel

19. Replacing wallets in the text

20. Touching the panel

21. Wallets can be configured from the panel The bot is installed in 3 independent branches, if at least 1 you remove it, you need to install yourself from another 000-attomspread The bot does not have any drops, all work happens with 1 file

22. dependence on net 4.0

Protection from virtual machines

SPOILER: LIST

WIKI
