The image is a composite graphic. On the left, a terminal window displays C code for a Lamport signature scheme. The code includes a `main` function that takes a message as input, calculates a Lamport signature using a private key, and prints the result. The code is written in a dark-themed editor. In the center, the text '你可以赢我' (You can beat me) is written in white, followed by a large green '100天' (100 days). To the right of the '100天' text, the text '让你输完只需1天' (It only takes 1 day to let you lose) is written in white. On the far right, a vertical text '一切都是代码控制' (Everything is code control) is written in white. The background of the image is a blurred screenshot of a terminal window showing the execution of the program, with output lines like 'Calculating Lamport keypair...', 'Obtaining random data from a secure source', and 'Calculating the public key from the private one'.
