试错优化-扫码率

The diagram illustrates the iterative optimization of QR code scanning rates through six stages:

- 第一版 (Version 1):** A basic QR code with a success rate of 99.99%.
- 第二版 (Version 2):** Optimized by changing the color to yellow and the background to gray. Success rate: 99.99%.
- 第三版 (Version 3):** Optimized by changing the color to yellow and the background to gray. Success rate: 99.99%.
- 第四版 (Version 4):** Optimized by changing the color to yellow and the background to gray. Success rate: 99.99%.
- 第五版 (Version 5):** Optimized by changing the color to yellow and the background to gray. Success rate: 99.99%.
- 第六版 (Version 6):** Optimized by changing the color to yellow and the background to gray. Success rate: 99.99%.

The final result shows a success rate of 99.99%.
