Received

0 BTC

You have to pay

0.02 BTC

Good morning!

We have encrypted all your personal files!

To see the list of encrypted files [click here](#)

We did this using typical RSA-2048 public key encryption. It basically means there is no way to decrypt your files without the private key. The private key is stored on our server.

Indeed, we can recover your files. You just have to pay us before the deadline (see the countdown). If you don't, the private key will be securely erased from our server and you will lose encrypted files forever.

Transfer requested amount (see on the left) to the Bitcoin address below, which was generated just for your payment. If you don't know how to use Bitcoin or where to buy Bitcoins, [click here](#). As soon as the transaction gets confirmed, the decryption will start automatically. It usually takes about 30 minutes for a transaction to become confirmed. You will be notified about any progress.

WARNING: Antivirus software may remove this program, but it can't decrypt your files. So, better temporarily disable your antivirus, because we can't decrypt your files if this program is damaged. Also, do not modify any of the encrypted files, otherwise even we won't be able to recover them.

If you have any questions or if you encounter any problems with payment, feel free to [contact us](#).

You have ordered **file decryption**. Your file is ready. [check now!](#)
